
Compromise the bad guys with uncompromising optics.

Bushnell binoculars reflect precision engineering and innovative thinking.

Optical excellence is pervasive throughout Bushnell's complete line of binoculars for law enforcement. Each model offers a satisfying level of brightness, clarity and resolution. They are a product of 60 years of crafting fine instruments using the finest glass, and employing the engineering and manufacturing expertise that helped build the Bushnell reputation for stellar performance in the field.

Elite
10x43mm

Brightness that's critical to the mission.

As premium long-range binoculars go, it's tough to top this remarkable 10x option. It features XTR® Technology — as do all Elite binoculars — which uses 60 layers of coatings on each prism to optimize available light. You get an impressive 99.73% light transmission efficiency per lens.

#631043

Elite® e2
Light transmission that outranks the rest.

Bushnell Elite e2 binoculars offer light transmission efficiency measured at 99.7% per lens, attributable to our Advanced Fusion Hybrid Lens system. This is a clear tactical advantage, because operators need every bit of light that's available in challenging low-light scenarios. Credit for such clarity and brightness is shared by our XTR™ technology and fully multi-coated lenses. Edge-to-edge clarity is a tactical trademark of Elite e2 binoculars. As is a high degree of contrast. Bushnell's Rainguard lens coating effectively eliminates fogging and disperses water droplets, so surveillance is never impeded. They're 100% waterproof, and built on a lightweight magnesium chassis that's all business.

#620142

Elite e2
10x42mm

Elite e2 7x26mm Compact.

Savvy operators understand the moment they put Bushnell Elite e2 binoculars to their eyes; these are among the brightest, sharpest binoculars in any theatre of operation. The most revealing technical spec is that the Elite delivers a combined 90% light transmission efficiency, thanks to our proprietary XTR™ technology platform. The components we engineer into Elite e2 binoculars are the finest that can be procured. This includes BaK-4 prisms which heighten image clarity and contrast to a level matching the seriousness of the job you do. Elite e2 7x26 binoculars feature Bushnell's new Rainguard HD coating for fogproof viewing in any conditions. The compact chassis is ultra light and streamlined, which translates into fatigue-reducing balance on patrol. Same goes for our textured rubber armor.

#620726

Elite E2
7x26mm

Infinity
10.5x45mm

Infinity
Versatility that answers the call.

Infinity binoculars are a no-nonsense solution for operators who value brightness, clarity, and durability. The design is a classic open-bridge configuration that performs admirably in terms of comfort and balance. They are lightweight and rugged. With image resolution that earns its keep, owing largely to Bushnell's SHR (Super High Reflection) Prism Coating. The eye relief is long, so prolonged use presents no particular challenge. Infinity binoculars are waterproof, fogproof, and armor-coated to handle the abuse consistent with everyday operations.

★ Bushnell® Binoculars

Perfect for the public face of law enforcement.

Legend
Ultra HD
10x42

Legend® Ultra-HD
A commanding field-of-view.

The basic truth about Bushnell's Legend Ultra-HD binoculars is this: For extra long eye relief and a sweeping field-of-view, there may be no better tactical optics. The new streamlined shape embodies a slimmer, lighter, tougher design philosophy. The lightweight magnesium chassis augments comfort in the field, as do the soft-touch grips accents on the rubber-armored housing. The Legend Ultra HD protects your settings with a locking diopter. Our super-premium ED Prime Glass serves up excellent color fidelity, brightness, and light transmission efficiency—working in tandem with Bushnell's Ultra Wide Band Coating (fully multicoated) to bolster contrast and resolution. Our new Rainguard™ HD further ensures a clear view in foul weather, and particularly when breath steam tries to fog exterior glass.

#191042

Legend
An optical legacy worthy of respect.

Operators far and wide salute the fundamental performance attributes of the Bushnell Legend, our classic roof prism binoculars for tactical applications. These stalwart field glasses have long flown the flag of ruggedness, brightness and overall optical clarity. They do their job and they do it well. Though this iteration is slimmer and 20% lighter than it's early ancestors, owing to the incorporation of a magnesium chassis. Always waterproof, shockproof and rubber-armored, Legend binoculars now also lay claim to our Rainguard™ HD lens coating. Premium BaK-4 prisms and fully multicoated lenses collaborate to deliver stellar light transmission, sharpness and color fidelity. For a more economical option, we offer our equally well respected porro prism Legends.

#190842

Legend
8x42mm

Excursion EX
10x42mm

Excursion® EX
A wide view, but not wide-eyed.

Bushnell's battled-tested experience at engineering quality optics comes to fruition with the introduction of the new Excursion EX binoculars. With the widest field-of-view of any binoculars in its class for tactical scenarios. And magnum powered brightness and clarity that's typical of far costlier options. The optics are fully multicoated. The prisms are high-performance BaK-4 glass, phase coated with Bushnell's PC-3 to help produce bright, clear images and edge-to-edge sharpness. Excursion EX binoculars earn their stripes by performing at a level much higher than might be expected at this price.

#244210

★ Bushnell® Riflescopes

May you never have to use it. And if you do, may you never miss.

Every Bushnell Riflescope represents a job well done.

Riflescope technology has evolved considerably during the more than sixty years Bushnell has been in the business. And this famous brand has always maintained a leadership position. Proof of this rests with such groundbreaking innovations as our Rainguard® HD anti-fog technology, the Elite 6500 Series with 6.5 magnification ration and the unmatched light transmission efficiency of Bushnell Elite® 4200 models. Top to bottom, the riflescopes shown here are worthy of inclusion on your team.

The Elite 4200 1.25-4x24mm— When Compactness Counts.

A compact, low profile, lightweight instrument designed expressly for law enforcement applications. A tough, reliable performer with a superb field of view. Finish is Matte.

#421424M
Illuminated Dot, 30mm Tube

The Elite 6500 Series For Long-Range Performance.

A clear, sharply focused sight picture you can rely on. Features a 6.5x power ratio, Mil Dot reticle, 30mm tubes and matte finish.

#652164T 2.5-16x42 (featured)
#654305T 4.5-30x50

The Elite 3200 10x40mm Is Fixed Power Perfection.

When 10x magnification is what you want, this stellar instrument serves with distinction. Target turrets allow for minute windage and elevation adjustments. A matte finish completes the package.

#321040M

The Elite 4200 6-24x40mm For Long-Range Performance.

A clear, sharply focused sight picture you can rely on. Features a Mil Dot reticle and matte finish.

#426242P 6-24x40 Side Parallax Adjustment
#426245T 6-24x50mm (featured)

The Elite 3200 5-15x40mm Has A Long Reach.

A natural for long-range precision, owing to our Mil Dot reticle, the adjustable objective and the sun shade. It's parallax adjustable from 10 yards to infinity. Finish is matte.

#325154T

★ Bushnell® Riflescopes/GPS

1x32mm Red/Green Dot Means Fast Target Acquisition.

The T-Dot reticle illuminates in red or green behind 1x magnification. There's no faster way to get on your target. Features a built-in mount for Weaver-style rail, and a CR2032 battery. Matte finish.

#730132P

Red T-Dot

Green T-Dot

Red Dot at the ready.

The tactical advantages of this reputable red dot scope are clear. Operators can shoot with both eyes open. It can handle all the recoil you can give it. The ultra compact TRS-25 has extended battery life at 3000 hours, and it's waterproof to IPX7 standards.

#731303

Built to get you back.

Civilians call it a personal location finder. You may start referring to the BackTrack™ as essential tactical gear. Because this easy-to-use device has the ability to point the way home, regardless of what constitutes home. Just click a single button and BackTrack literally points the way with an arrow, based on the coordinates you programmed into it. The readout even displays the distance to travel. Think basic GPS. Think highly compact and stowable. Think about how useful BackTrack can be at the end of a mission, because it relieves operators of the responsibility of remembering the way home.

Requires 2 AAA batteries (not included)

★ Bushnell® Laser Rangefinders

Adversaries will think you're too close. Whatever the range.

Bushnell Laser Rangerfinders know no peer.

An unmatched level of technical innovation is the hallmark of the Bushnell Laser Rangefinders presented here. All models are the work of an R&D team that strives and succeeds at being the best in the world at what they do. They combine real-world feedback with Bushnell's sixty years in the optics business to craft rangefinders of the highest order. We're talking instant precision. And accurate yardage readings between you and those you pursue.

The 4-12x42mm is both riflescope and rangefinder.

See your target with crystal clarity. That's the dynamic performance promise of the 4-12x42mm, which combines properties of a premium riflescope with a laser rangefinder and bullet-drop compensator. The optics are fully multi-coated for brightness and color fidelity.

Riflescope Features:

- ★ 100% waterproof and fogproof.
- ★ Windage and elevation click valve is .25.
- ★ Mil-Dot™ reticle.
- ★ Weighs just 24 ounces.

Rangefinder Features:

- ★ Range is 30 to 800 yards/meters.
- ★ Standard and scan modes.
- ★ Wireless trigger pad.
- ★ Runs on one 3-Volt battery (included).
- ★ Bullet-drop compensation turrets.

#204124

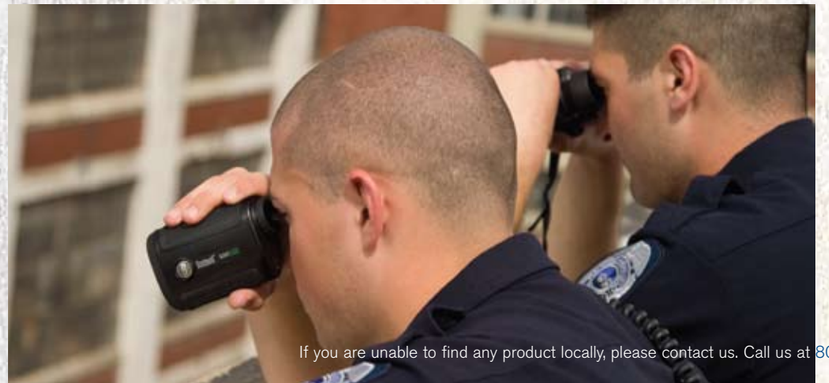
BDC Turrets: Install the one of the eight included turrets that matches your caliber. When the range appears in the reticle, simply adjust it to the corresponding distance and hold dead-on.

Let the Scout® 1000 ARC determine your true distance.

Amazingly compact and simple to use, our Scout™1000 with Angle Range Compensation (ARC) figures distance based on terrain angle to give you an accurate "shoots-like" distance. In Rifle mode, it even tells you where to hold. Accurate from 5 to 1,000 yards. Range your target with the tap of a single button – in a unit small enough to fit your shirt pocket.

- ★ Built-in inclinometer.
- ★ Pocket-size ergonomic design.
- ★ 5x magnification.
- ★ Rifle mode – provides bullet-drop/ holdover in inches.
- ★ BullsEye, Brush and SCAN Mode.
- ★ Rainguard HD
- ★ Rainproof
- ★ Range: 5–1,000 yards.
- ★ Carrying case and neck strap.

#201932 ARC



The Elite® 1500 is as good as it gets.

You're looking at a rangefinder that's accurate from five to 1,600 yards. It's bright. It's sharp. And it comes with three different targeting modes. The 1500 is a rugged customer that's indifferent to the elements, particularly since it has Rainguard® HD on the lenses. There's even an internal LED for low-light conditions.

- ★ Standard scan mode.
- ★ BullsEye™ mode.
- ★ Brush™ mode.
- ★ 100% waterproof
- ★ Fully multi-coated optics.
- ★ Rubber armored.
- ★ Twist-up eyepiece.
- ★ Built-in tripod mount.

#205100

The short-action magnum of laser rangefinders.

In ranging distance and ballistic capability, no unit on the market packs this much power in such a handy, easy-to-use package. Engineered with a compact, vertical configuration, the new Legend 1200 ARC delivers instant distance readings to 1,200 yards, while calculating a true "shoots-like" distance based on terrain angle using Angle Range Compensation technology. In Rifle Mode, it tells you where to hold. Bow Mode eliminates guesswork with true horizontal distance from 5-99 yards. That's right, the same function that requires two units from other manufacturers is right here in your fingertips. And weather is never an issue thanks to fully waterproof construction and new Rainguard HD anti-fog technology. Pick it up and you'll see: this is one small unit destined to make a huge impact in 2009.

#204100

★ Bushnell® Night Vision

Darkness aids and abets the bad guys. Bushnell Night Vision doesn't.

This is ultra-efficient light gathering technology with built-in infrared illuminators.

Bushnell is proud to offer two Night Vision instruments that have proven effectiveness in law enforcement scenarios. Choose from a binocular or monocular. There's even a stunning digital model that pierces darkness with an infrared spotlight. Whichever you choose, you'll benefit by a level of light gathering technology that only Bushnell can muster.

Style: Gen 1 Binocular

2.5x42mm Binocular.

Count on comfort during extended use, thanks to lightweight construction. The range of view is extra long, while the field of view is very wide.

#260400

5x42mm StealthView™ is the essence of digital night vision.

Consider stepping up to a digital monocular that's equipped with a powerful infrared spot-light that produces a sight picture that stands tall along side Generation 2 and 3 optics. The image offers crisp, edge-to-edge sharpness. Even in complete darkness.

- ★ Image comparable to Gen 2+.
- ★ CMOS vs image intensifier tube.
- ★ In-view B&W micro display.
- ★ Adjustable eyepiece.
- ★ Commanding infrared spotlight.
- ★ Viewing range is 600 feet.
- ★ Weather resistant.
- ★ Video output.
- ★ Built-in tripod mount.
- ★ Runs on six AA batteries.
- ★ Two hours of continuous run time with IR on.
- ★ Eight hours of continuous run time with IR off.

#260542

★ Bushnell® Spotting Scopes/Field Imaging

It's more than capturing images. It's capturing evidence.

Bushnell Spotting Scopes bring in the detail from great distances.

You can expect unparalleled brightness, clarity and edge-to-edge detail from a Bushnell Spotting Scope when used in long-range surveillance scenarios. They're rugged. Waterproof. And dependable, thanks in no small part to Bushnell's Rainguard® HD protective coating, which keeps visible droplets off the lenses.

View with Extreme Precision

A compact with a full-size punch. The ultimate fusion of portability and powerful viewing capability, our waterproof fogproof Excursion spotting scope features a compact folded light path design and ED Prime Extra-Low Dispersion flourite glass. ED glass delivers amazing resolution and color fidelity, and transmits maximum available light. Expect outstandingly detailed, color-true viewing from first to last light. The 15-45x60mm model is now available in a special Tactical version, with blackout exterior and a precision mil-dot reticle for ranging your target distance, at any magnification. For stable viewing, we've included a tripod, plus a soft case that can be left on to protect the scope during use. Also includes a hard case.

- ★ Folded lightpath design yields full-size capability in a compact housing.
- ★ Fully multi-coated optics for maximum brightness.
- ★ Excellent eye relief.
- ★ Includes tripod, soft case and hard case.

#781569ED

Field Imaging is a law enforcement tool like no other.

Testifying as to what you saw is fine. But showing the Court what you saw in the form of digital imaging might be even better. Bushnell Field Imaging instruments give you the ability to freeze fleeting images, so that they can become part of the body of evidence. Bushnell digital technology makes it all possible.

A compact 8x30mm binocular that's also a high power 5MP digital camera.

You get the magnification of an 8x binocular, combined with the ability to take digital photographs. There's even a flip-up LCD display screen for instant viewing.

- ★ 8x magnification.
- ★ 30mm objective lenses.
- ★ BaK-4 roof prisms.
- ★ Fully multi-coated optics.
- ★ 5.0 megapixel still pictures.
- ★ SD card slot.
- ★ Neck strap and carrying case.
- ★ 1.5" flip-up LCD.
- ★ Sync focus links the camera lens with the binocular focus for sharp photos.
- ★ Instant replay video loops up to 60 seconds.
- ★ Continuous video mode (up to 640x480@30fps)
- ★ 16MB internal memory

#118326

Home Sentry Security Kit

A complete security cam set in one easy to use package. Great for property security or remotely stored valuables. See what happens when you can't be present.

- ★ Solar panel.
- ★ Rechargeable batteries.
- ★ SD card.
- ★ Ratcheting bracket.
- ★ 5 MP Digital Images.
- ★ 15 Second video clips.
- ★ 20 LED Night vision flash (range 30 feet).
- ★ Easy to use system.
- ★ Color images by day; night vision images at night.
- ★ Infrared sensor is motion activated.
- ★ Adjustable web belt strap with buckle.
- ★ Low battery indicator.
- ★ Password protected.

#119305SC

★ Bushnell® Flashlights

Bad news for people who have something to hide.

HD™ Flashlight
100400C

1-Watt LED
100090C
GunMetal Grey

3-Watt LED
100200C
GunMetal Grey

100100C
Matte Black

3-Watt LED runs continuously for four hours.

If you're not sure what 81 lumens of light looks like, turn on Bushnell's 3-Watt LED.
It's twenty times brighter than ordinary LED flashlights. Available in grey or black.

- ★ Constructed from aircraft-quality aluminum.
- ★ Powerful 3-Watt Luxeon white LED.
- ★ Rotating head with high, medium, low, S-O-S and safety strobe settings.
- ★ Waterproof.
- ★ Hard anodized finish that won't scratch or mark.
- ★ S-O-S visible from more than three miles.
- ★ Find-me feature and battery life indicator.
- ★ Secure mode prevents accidental on and off.
- ★ Four-hour run time.
- ★ Includes two 3-Volt lithium batteries and lanyard.
- ★ Length: 6 inches.

Welcome the four cutting edges of flashlight innovation.

Edge to edge, no flashlight in the world today delivers a comparable level of radiant intensity and consistency of brightness. Using patented technology that produces a perfectly uniform – square – pattern of light, our new HD Torch completely illuminates every inch of its range with a bright, clean light offering superior image definition. Unlike conventional circular flashlight beams, it emits no irregular "blobs" of light and prevents shadows. Thus, it is the perfect tool for bloodtrailing or locating lost items using the grid pattern. It can light up an entire wall without moving the beam side to side and is the optimum choice for reading as well. The 165-lumen output lasts for up to 1.5 hours on its two 3-volt lithium batteries (included). Crafted of rugged aircraft-grade machined aluminum with our Find-Me glowing "B" on the rear button.

Bushnell LED flashlights burn bright and long.

- ★ Evenly distributed square beam light pattern
- ★ Powerful 165-lumen output
- ★ 1.5 hour continuous run time
- ★ Rotating head with high and safety strobe settings
- ★ Rugged, waterproof, aircraft-grade aluminum housing with hard-anodized finish that won't scratch or mark
- ★ Find-me feature and battery-life indicator
- ★ Includes two e-volt lithium batteries and lanyard

1-Watt LED balances compactness with longevity.

It's only four and a half inches long. Yet Bushnell's 1-Watt LED packs a bright, long-lasting punch. It's ten times brighter than regular LEDs. And it's continuous run time extends two and half hours. It's a smart solution when space is a premium.

- ★ Powerful 1-Watt Luxeon white LED.
- ★ Thirty lumens of illumination.
- ★ 100,000 hour LED lifespan.
- ★ Rugged aircraft-quality aluminum housing.
- ★ Hard anodized finish won't scratch or mar.
- ★ S-O-S beacon visible from more than two miles.
- ★ Includes one 3-Volt lithium battery and lanyard.
- ★ Length: 4.6 inches.

Find-me feature and battery life indicator.

The rear cap on the 3 watt LED flashlights have a glowing "B" that shows red for low battery and green for strong battery. Plus, the glowing "B" makes it easy to locate the flashlight.

In addition to the battery life indicator the glowing button doubles as a Find-me feature.

Optimum Battery

★ Millett® Riflescopes

AUTOMATIC BRIGHTNESS ADJUSTMENT
The Millett Zoom Dot™ automatically adjusts dot brightness to match ambient light conditions, giving the warfighter a bright dot inside a dim building or outside on a snow covered field.

Zoom Dot®

The Millett Zoom Dot™ 30mm reflex sight is a non-magnifying 1-to-1 ratio red dot illuminated aiming system that can be used in all lighting situations with one or both eyes open. The dot size can be zoomed down to 1 MOA for a long-range accurate shot, or up to 10 MOA for super-fast target acquisition under close quarters battle, by simply turning the knob. Extensive testing on the S&W 500 mag and other high-impact weapons has proven that the ZOOM DOT is the most durable dot sight available. Its package size has been reduced, and a special mount is available for super-high-impact applications.

Features

- ★ Optical glass lenses – parallax free, multi-layer coating
- ★ Unlimited eye relief – dot maintains point-of-aim
- ★ Same batteries as the M68 weapon sight – 2L76 CR1/3N lithium battery
- ★ Solid state field replaceable electronics
- ★ Waterproof to 300'
- ★ Comparable to current battery life for the M68 weapon sight –1000 to 10,000 hours average life
- ★ Approx. 5.5 inches long
- ★ Weight: 8 oz
- ★ Temp. range-50 to 160 F
- ★ Withstands G forces beyond the levels encountered by small arm weapons (2000 Gs)
- ★ 30mm tube

ZM00002	Quick Mount

Tactical Rings

Millett Tactical Rings are a light-weight, strong solution for the most demanding uses. 6 cap-clamping screws positively hold your scope, no matter the level of recoil and the base clamp holds the scope to the base. High and medium heights come in a matte finish. Millett tactical rings are your answer to demanding mount needs.

Tactical Scope Rings w/ Accessory Rail

Millett's new Tactical Accessory Mount Scope Ring allows the mounting of lights, lasers, back-up sights and other items above the objective of 30mm scopes. Simple Picatinny rail mount allows easeof- mounting with clamping-type Weaver rings. Available in low, medium, and high ring heights. Positive, sure mounting for your scope and easy-to-use accessory mount all-in-one.

Grabber®

The Grabber™, in 1 inch and 30mm, is the answer for quick, easy, repeatable mounting of scopes and other tactical tools, such as lights and lasers on Weaver, Picatinny-type rails. Manufactured with heat-treated steel for strength, the Grabber returns to zero every time. A 5-to-1 mechanical advantage locks the Grabber to the rail without cams and weak components. For quick, positive mounting, go with the Grabber.

Picatinny Rails

Millett's Picatinny Rails are offered for the Remington 700 LA + SA right hand, Savage Accutrigger LA + SA right hand, and also in the blank tactical. The easy, strong mounting system is similar to US military 1913 mounts. You can mount a wide range of optics using this rail, from red dots to large target scopes. The rails are heat treated T6 aluminum, black anodized with all required hardware for mounting. Millett's Picatinny Rails are priced right and give that custom look to any rifle. Risers for rimfire rifles are available in two models – one for bolt action and one for semi-automatic.

M4 Riser Rails

Millett's M4 riser allows the mounting of scopes and other optics on flat top AR, M4 and other rifles using normal height scope rings. Solid and secure, the M4 riser allows proper cheek position for these style firearms. Riser clamps onto any Picatinny/Weaver-type base.

Marksman Tactical Glasses

The Bollé Marksman is the future of tactical glasses. The extended shield provides maximum protection and field of view. Adjustable Thermogrip® nose pads and temple tips allow for truly customizable fit. The Marksman surpasses ANSI Z87.1, and the 15 cal. military ballistics test, MIL-PRF-31013. The next generation polycarbonate lens blocks out 100% of UVA/UVB rays, features Carbo Glas® protective hard coating, and is available in five lens tints. Choose from Grey, Citrus, Clear, Lemon or Vermillion.

★ Bollé® Tactical Goggles

Wearing anything less is considered suspicious behavior.

Bollé Tactical Goggles keep watch over the welfare of your eyes.

We're talking frontline protection for eyes that have seen a lot, or fully expect to. These premium tactical goggles are designed and engineered per the strict requirements of law enforcement agencies that expect nothing less than optimal performance and failsafe protection for their men and women. Bollé Tactical. No-nonsense goggles for no-nonsense cops.

SS
Technical Performance

The SS tactical glasses were developed for function and performance. Co-injected construction provides lightweight, durable frames, with softer rubber nose pads and temples for stay-on-your-face fit in any environment. P80plus ™ anti-fog coating keeps vision clear in harsh conditions. The SS surpasses the industry standard for tactical glasses – ANSI Z87.1. Available in four colors.

Grey

Clear Yellow

Viper
Wrap-around comfort.

At a mere 28 grams, these sophisticated glasses are considered ultra-lights. Yet they're heavyweights when it comes to excellent wrap-around protection and a wider field of view. The one-piece front is rugged polycarbonate. The nylon temples are fully adjustable. And the overall fit and feel is the epitome of daylong comfort.

Clear

Grey

Silium
Tactical Style

The pure curves of Silium's metal frame suggest a lean, highly functional design philosophy. One that relies on technically advanced materials such as brass, which surpasses plastic frames in four key ways: (1) It's more durable, (2) It's an ideal weight, (3) It benefits from electric insulation, and (4) It's free of nickel. You also get maximum protection against shocks, and 100% UV filtration. Flexible materials in the bridge mean extra comfort. As does the 160° range of motion from the flex temples.

Contrast

Clear Grey

Axis®
Tactical Style

Bollé takes full advantage of its many years of experience and expertise to bring the latest technologies to tactical eyewear. The Axis is a fine example. Because it features O-ring injections that ensure perfect optical quality, along with the combined injection of polycarbonate and TPR into the pivoting temples. Eye shields on the sides are integral to the basic design. And impacts are greatly minimized, thanks in part to the adjustable silicone bridge. You get all of this safety, plus a 180-degree panoramic view.

★ Serengeti® Sunglasses

FLEX SERIES

Hold them in your hands and you can feel the craftsmanship. Put them on and your notion will be confirmed—these sunglasses were destined for you. The perfect fit of the Serengeti Flex Series sunglasses can be attributed to our cutting-edge frame technology, which automatically adjusts to the contours of your head. Flexible yet precise, comfortable yet strong, these frames offer you the best of both worlds.

★ M-Pro 7®

You shoot straight...

When the call first went out for a gun care system to satisfy the needs of those who shoot frequently, M-Pro 7® answered in spades. This system is uniquely suited to the demands of military-style scenarios, where field cleaning is the order of the day. M-Pro 7 cleans deep, lubricates uniformly, conditions thoroughly, and protects to the hilt. Count on M-Pro 7 in harsher environments, where corrosion protection is mandatory in the face of the elements and heavy use. It's the best way to make sure your weapon behaves as professionally as you do.

Weapon Maintenance System.

- ★ Reduces weapon maintenance time.
- ★ Exceeds milspec cleaning system requirements.
- ★ Commercial transportable worldwide.

M-Pro 7 Cleaner Lubricant Protectant

Provides superior lubrication and corrosion protection for military and law enforcement type weaponry.

- ★ Removes surface carbon quickly.
- ★ Repels dust, dirt and carbon.
- ★ Extreme climate protection.

#070-1407	2 oz.

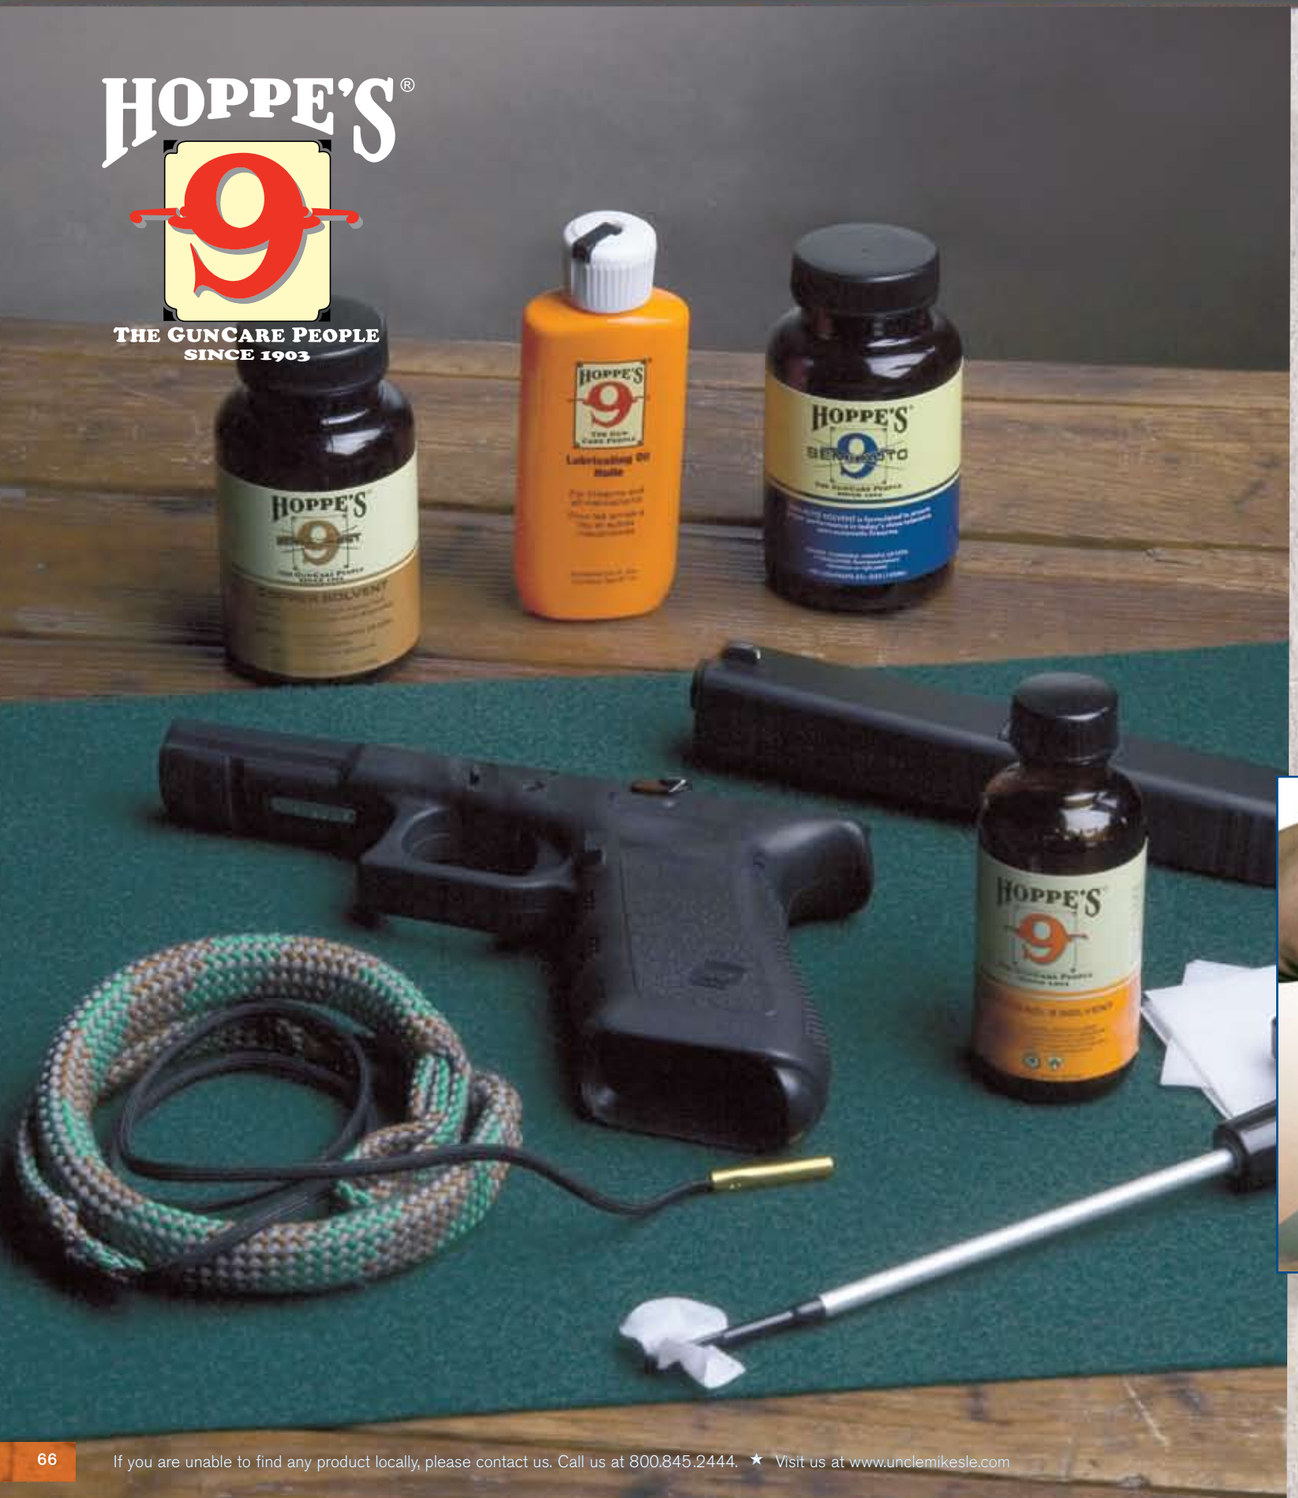
- ★ M16 breach brush.
- ★ Screwdriver handle for cleaning rod.

#070-1556



The ritual of cleaning your gun just got a little more righteous.

Hoppe's Elite Gun Cleaner

Hoppe's Elite Gun Cleaner cleans down to the pores, removing layers of fouling and embedded carbon that has been there since your gun's first firing. With continued use, Hoppe's Elite conditions your bore to resist additional carbon fouling — making gun cleaning easier and faster. In fact, using Hoppe's Elite regularly can cut your gun cleaning time by up to 80%. Plus, Hoppe's Elite is non-toxic and biodegradable, so you can literally clean your gun at your kitchen sink, without worrying about harmful chemicals and fumes.

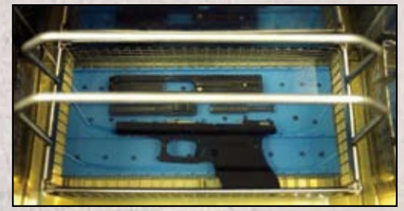
32 oz.	#GC32

Glock in a submersion tank containing **Hoppe's Elite Gun Cleaner**



Side-by-side comparison shows how Hoppe's Elite cleans down to the pores

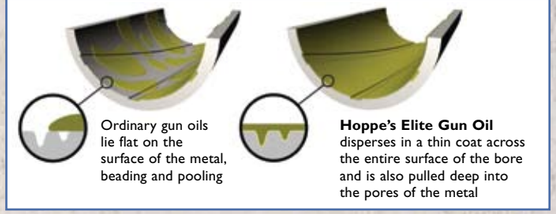
Carbon rings left behind by ordinary gun cleaner

Spotless cleaning with **Hoppe's Elite Gun Cleaner**

Hoppe's Elite Gun Oil

Hoppe's Elite Gun Oil is the perfect match to our Hoppe's Elite Gun Cleaner. The oil uses super slick technology that eliminates puddling in the bore and instead creates a micro-fine layer of oil all over the surface. With this superior coating layer, you actually get better, longer-lasting protection throughout your firearm.

2 oz. #GO2 4 oz. #GO4



Ordinary gun oils lie flat on the surface of the metal, beading and pooling

Hoppe's Elite Gun Oil disperses in a thin coat across the entire surface of the bore and is also pulled deep into the pores of the metal

Hoppe's Elite Bore Gel

For deep cleaning and metal conditioning, Hoppe's Elite Bore Gel is the right choice. Its thicker formula clings to the unique interior shapes within a bore to clean more deeply. It contains the same state-of-the-art aerosolvents, surfactants and other compounds found in Hoppe's Elite Gun Cleaner.

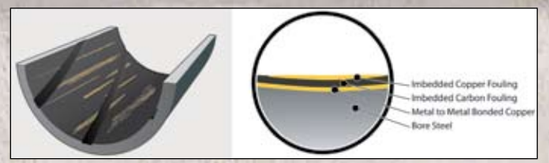
4 oz. #BG4

Hoppe's Elite Copper Terminator

Our new Hoppe's Elite Copper Terminator creates a powerful system when combined with Hoppe's Elite Gun Cleaner. The gun cleaner removes the carbon which typically slows the copper etching process. The Copper Terminator etches faster than standard ammonia-based products, which allows the gun cleaner (used intermittently in the process) to penetrate under the copper and remove it even faster.

- ★ Works up to 4 times faster than other copper removal systems.
- ★ Is ammonia free, virtually odorless, non-hazardous, non-flammable and can be shipped overnight.
- ★ Is completely safe on bore steel.
- ★ Does not leave ammonia-type crystals after use that can attract water from the air, expand and cause corrosion and/or microscopic stress fractures.
- ★ Conditions the bore so copper does not build up as quickly.

2 oz. #ECC2 4 oz. #ECC4

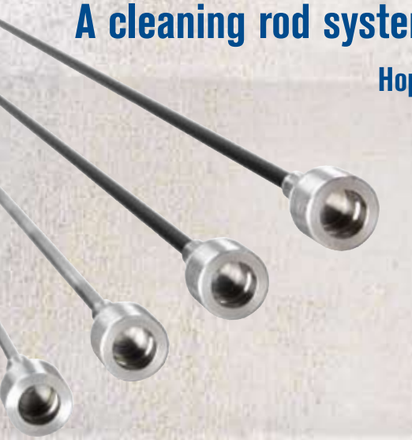


HOW HOPPE'S ELITE COPPER TERMINATOR WORKS

Here the surface carbon and copper fouling have been removed by Hoppe's Elite Gun Cleaner; exposing the "welded" copper attached to the bore. Hoppe's Elite Copper Terminator is needed to dissolve or etch the welded copper from the bore steel. Removal of the carbon allows for the copper cutter to "attack" from all angles. Etching of copper from above and below makes for maximum removal time and speedier cleanings.

★ Hoppe's Elite®

A cleaning rod system you'll value as much as your gun.



Hoppe's Elite brings a whole new concept: one handle, many rods.

Hoppe's Elite Cleaning Rod System

If you have several firearms that need cleaning, you're going to love this new Hoppe's Elite cleaning rod concept that uses a single handle to accept all rod diameters and lengths. The handle is ergonomically designed and comfortable enough to handle even the toughest cleaning project. Change to a new rod length or diameter simply by pushing a button.

Handle

- ★ Push button attachment and detachment allows for quick changeovers.
- ★ Precision ball bearings allow smooth rotation of rod.
- ★ Accepts all rod diameters and lengths.

Rods

- ★ Available in all rod diameters and lengths: pistol, rifle and shotgun.
- ★ Choose from stainless or coated rods. The stainless rods are manufactured from 17-4 stainless steel and the coated rods from high quality spring steel. Both rod materials offer exceptional yield and tensile strength to ensure that your rods remain straight and true through years of use. Stainless rods are polished to a micro-fine finish and coated rods employ a unique DuPont® hard epoxy coating for protection of rifling.
- ★ Encased in a self-storing package for extra protection.
- ★ Rods accept standard 8-32 threaded brushes and jags, and are long enough to use with a Hoppe's Universal Bore Guide.

Hoppe's Elite Interchangeable Rods

Cleaning Rod Handle		#ECRH	

Handle attaches quickly to any Hoppe's Elite Cleaning Rod, and formed cushion grip assures comfort and ergonomic fit

With the Hoppe's Elite Cleaning Rod system, one single handle gives you access to a wide variety of cleaning rods, all at the push of a button. Quality ball bearing design and state-of-the-art engineering assure you can clean effortlessly, with perfect rod rotation and the strength you need.

Storage for Elite Cleaning Rods is easy, because each rod comes in its own clear acrylic tube, keeping the rods straight and true. Simply hang them on a peg board or workbench for quick access.

Hoppe's Elite Foaming Gun Cleaner

Now get the excellent bore cleaning action of Hoppe's Elite in a foaming cleaner. This spray-on foam cleans deep into the bore, removing carbon and fouling better than ordinary cleaners. Hoppe's Elite Foaming Gun Cleaner is odorless, non-toxic, non-flammable and bio-degradable, so you can clean anywhere, even in unventilated rooms.

4 oz. #EFGC4

★ Hoppe's® Solvents

The highest possible ranking for solvents has always been No. 9

Semi-Auto Solvent: The full-bore solvent for semi-autos.

To remove copper, lead and powder fouling from today's high performance, semi-auto firearms, look no further than Hoppe's Semi-Auto Solvent. This cleaner leaves no trace of residue that can cause sticking or jamming in semis that are finely tuned. Perfect for competition shooters. Use on semi-autos or any firearm.

5 oz. Bottle. #SA904

HOPPE'S
9
THE GUNCARE PEOPLE
SINCE 1903
HOPPE'S NO. 9 SOLVENT
Powder solvent cleans bores and prevents rust in rifles, shotguns, pistols and revolvers.

Bench Rest 9: How cops eliminate copper quickly.

Copper fouling, the bane of shooters, doesn't have to be a problem any longer—thanks to Hoppe's Bench Rest 9®. With this powerful solvent, copper fouling can be cleaned from the bore overnight, instead of taking the standard 3 to 4 days. Bench Rest 9 is safe and effective and contains no abrasives. Although the solvent is essentially a copper buster, it's also great for removing powder, lead and plastic fouling from rifles, shotguns, pistols and revolvers.

Bench Rest Lubricating Oil with Weatherguard™

A proven winner for all shooters. Use before and after range practice to provide moisture and rust protection. Unlike conventional lubricating oil, Hoppe's Bench Rest Lubricating Oil with Weatherguard contains a moisture-fighting agent that drives moisture out while lubricating your firearm. Available in 2 1/4 oz. Squeeze Bottle.

Squeeze Bottle	#BR1003
Squeeze Bottle with Clamshell	#BR1003B

Moisture Displacing Lubricant

MDL drives out moisture while it cleans, lubricates, protects and prevents corrosion on metal surfaces. Ideal for immediate after-use protection of guns, fishing gear and most outdoor equipment. Prevents damage from moisture, salt and friction.

4 oz. Aerosol	#MDL

Dri Lube

Dri-Lube reduces friction on metal and bearing surfaces, without sticky oils or silicones. Plus, Dri-Lube doesn't attract dust or dirt and it evaporates in seconds, leaving a dry lubricating film.

4 oz. Aerosol	#DL1

Moly Aerosol, Paste and Oil

A molybdenum disulfide compound, Hoppe's Moly provides excellent lubrication under extreme heat and pressure. Bullets achieve higher velocities and greater accuracy. Also prevents wear and reduces fouling, making barrels easier to clean. Perfect for competition shooters. Use the paste and oil for coating bores, the aerosol for bores and bullets.

4 oz. Aerosol	#3068

Gun Grease

Specifically compounded for protecting idle firearms, Gun Grease displaces metal "sweat" when applied to bore or exterior metal. It also provides long-term protection when cleaning is delayed by lubricating moving parts and protecting them from corrosion.

1 3/4 oz. Tube.	#1102

★ Hoppe's® Boresnake®

The BoreSnake gives muzzle velocity a new meaning.

This patented one-piece wonder cleans, brushes and swabs.

All at once.

Never before has something so simple had such an impact on the shooting industry. The revolutionary BoreSnake is the world's fastest bore cleaner. It eliminates the hassle and mess of cleaning pistols, rifles and shotguns. Because one or two pulls will make your bore shine. So BoreSnake is ideal for the field, or quick cleanups. To prep for storage, just add a few drops of Hoppe's No. 9®, Hoppe's Elite® or Hoppe's Lubricating Oil.

A brass weight on the pull cord is stamped with the size. And we make machine-washable BoreSnakes for most popular calibers. Look for your firearm on the chart below.

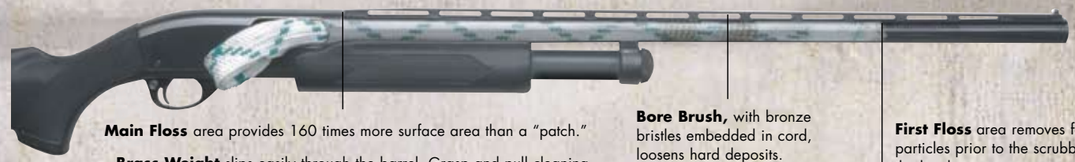
Here's how the BoreSnake works...



Main Floss area provides 160 times more surface area than a "patch."

Brass Weight slips easily through the barrel. Grasp and pull cleaning cord through bore. Stamped for identification of caliber or gauge.

Bore Brush, with bronze bristles embedded in cord, loosens hard deposits.

First Floss area removes foreign particles prior to the scrubbing action of the brush.

★ Hoppe's® Boresnake® Cleaning Kits

BoreSnake Soft-Sided Gun Cleaning Kit

A complete BoreSnake Gun Cleaning Kit in a rugged, soft-sided case that attaches easily to a belt or fits compactly into a box or bag. Kit includes BoreSnake, Hoppe's No. 9 Solvent, Hoppe's Lubricating Oil, Hoppe's Weatherguard Cloths and Pulling Tool.

★ Hoppe's® Cleaning Kits

Hoppe's Cleaning Kits. Because few things are more satisfying than a clean gun.

Universal Field Cleaning Kit

This handy Universal Kit works equally well for pistols, rifles and shotguns. Accessories are neatly packed into a rugged soft-sided case that attaches easily to a belt or fits compactly into a box or bag. Contains all necessary accessories, except brushes, with plenty of added room for things like Hoppe's silicone cloth and cleaning brushes. Specially designed cleaning rod uses single rotating handle for all types of firearms. Great when you can't pack a full-size Hoppe's cleaning kit.

#FC2

Premium Universal Field Kit

Bring all your cleaning supplies and accessories to the range in this soft-sided version of our popular wooden Bench Rest Premium Gun Cleaning Kit. This full-sized field cleaning kit has everything you need, plus extra room to add your personal tools. Kit includes: No. 9® Solvent, Lubricating Oil, assorted gun cleaning patches, 3-piece solid brass cleaning rod, 3 slotted ends, 2 adapters, 5 popular phosphor bronze cleaning brushes, silicone cleaning cloth, phosphor bronze utility brush, bore light, 12" x 36" gun cleaning mat, and Hoppe's "Guide to Gun Care."

★ Hoppe's® Cleaning Kits

Hoppe's accessories wouldn't be so famous if they didn't work so well.

Complete with aluminum rods and a long history.

Cleaning kits are some of our most popular items because they make so much sense for so many people. You'll find our kits contain everything you need to get your firearm as clean as it can be. From solvents to lubricating oils, patches, slotted ends and brushes, Hoppe's cleaning kits come complete with the elements you need for shooting and/or storage. We offer kits in plastic reusable boxes with instructions mounted right in. They make storing your components easy. Or if you want a more economical cleaning kit, select from a Hoppe's clamshell kit—each has the same accessories, except for the plastic storage box.

Here's what's included in Hoppe's Cleaning kits:

- ★ Hoppe's No. 9 Solvent, 2 oz.
- ★ Hoppe's Lubricating Oil, 2.25 oz.
- ★ Patches, square die-cut patches for an absorbent surface with deep cleaning.
- ★ Slotted ends and adapters, where appropriate.
- ★ Aluminum Cleaning Rods.

Rifle Cleaning Kit

★ Hoppe's® Cleaning Accessories

With Hoppe's cleaning accessories, even the toughest customers come clean.

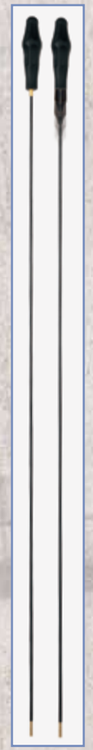
Choose the cleaning components that set the standard.

Premium One-Piece Graphite Rod

No longer do professionals have to fear inadvertent metal contact that can harm fine rifling and affect accuracy. These new one-piece graphite cleaning rods were created by Hoppe's to eliminate worries. Combining high strength and light weight, these rods are 100% graphite, not coated metal that can chip and peel. The advanced design has a comfortable, ergonomic handle, too — the rifle rod even rotates to follow delicate barrel rifling.

Length 36".

Shotgun #RG1S



The Bore Guide prevents damage caused by misalignment, which protects precision crowning.

Muzzle Guides

Protect your muzzles from rod and cleaning handle scrapes with these muzzle guides. They fit right into the bore.

Rifle #RMS
Shotgun #SMS

Universal Bore Guide

The Universal Bore Guide is just what's needed to properly clean almost any caliber of centerfire bolt-action firearm. Three interchangeable chamber tips fit bore sizes from .17 to .416 caliber. Aluminum Action Collar fits .695"/.700" (17.65mm/17.78mm) diameter bolt actions of any action length. Threaded Brass Pin locks the guide into the action in place of the bolt to allow proper cleaning from the breech.

#UBG

Nylon and Phosphor Bronze Brushes

Nylon brushes will handle most cleaning jobs and the built-in memory makes the bristles return to their original shape, so the brushes can be used over and over again. Nylon offers a unique scrubbing action for a thorough cleaning. Phosphor bronze brushes are available in the same styles and calibers as the nylon, but these brushes are most effective on lead.

Tornado Brushes

Known as "The Gunsmith's Brush," the Tornado brush has a special spiral-wound design that's highly effective for cleaning bores. The stainless steel loops eliminate any bristle ends that could leave scratches, yet still removes fouling without damaging the bore.

Cleaning Swabs

100% cotton swabs are soft, washable, and will not scratch smooth shotgun bores. Swabs available for all gauges and most rifle calibers.

Protect your scope with Butler Creek scope covers

MultiFlex Flip-Open™ Scope Covers

- ★ Butler Creek MultiFlex Flip-Open Scope Covers are spring-activated to give you the fast opening action you need. The tight, flexible collar prevents field of view blockage, eliminates accidental opening, and protects against snow, rain, dirt and dust.
- ★ Measure both the outside diameter of the eye and objective ends of your scope and use the sizing information on page 86 to find the cover that works best for your scope.

Silent action hinge provides flawless performance in all weather
Inner o-ring provides an airtight seal to keep out dust and moisture
Ergonomic button design has a non-slip surface for one-touch action

Flip-Open Scope Covers

Butler Creek's Flip-Open Scope Covers are custom fitted to your specific scope for maximum protection. Quiet opening lids flip open at the touch of your thumb and are virtually silent. The red button that opens the cover is ergonomically designed so that even the slightest pressure applied will open the lid allowing you to keep your eye on the target, without fumbling to open the scope cover.

Water-tight friction mounts anchor the covers to your scope while an airtight semi-o-ring keeps out dust and moisture that can damage and cloud your scope. In fact, our scope covers have been tested to perform from –40 degrees to 120 degrees.

- ★ Design serves both right-and left-handed shooters.
- ★ Weighs less than an ounce, but protects in the most extreme conditions. See fit chart on page 88.

For more fit information, please call customer service at (800) 845-2444.

Flip-Open Spotting Scope Covers

The same easy flip-open technology and rugged durability of the standard scope covers that now fit spotting scopes as well. Just measure your spotter and order from the chart on page 86.

NOTE: Do not use with grip safeties.

Slip-On Grips

Improve your control with virtually any pistol by slipping these grips onto the pistol stock. Medium and large size have finger grooves. Available in three sizes.

Med.	Fits compact large frame autos	#50542
Large	Fits full size large frame autos	#50543

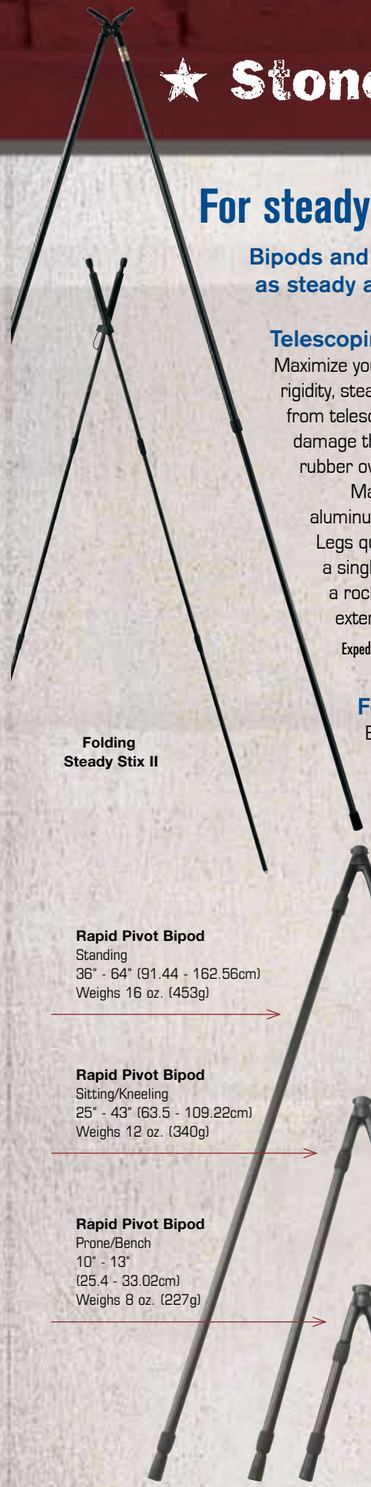
Bipods and monopods that are as light as a feather, as steady as a rock.



Telescoping Bipod
Maximize your ability to shoot accurately at any moment with the rigidity, steady support, versatility and portability you can only get from telescoping bipods. This bipod won't alter the gun's accuracy or damage the firearm like attached bipods can, thanks to a protective rubber over-molded yoke that protects your gun's finish.

Manufactured from high-strength, lightweight, tempered aluminum with a corrosion-resistant, satin black anodized finish. Legs quickly telescope up or down, then rigidly lock in place with a single half twist. Our exclusive Posi-Lock™ system guarantees a rock-steady hold and reliable, unlimited adjustments. Legs extend from 35" to 65". Weighs 18 oz.

Expedition Bipod #T2B65-BXX

Folding Steady Stix II
Experience one-shot confidence when you shoot with rock-steady feather-light folding Steady Stix II. With Steady Stix, you get versatility on any terrain — a steady hold on a steep hillside or rooftop. More convenient, portable and versatile than attached bipods and won't change your point of impact.

To use, simply pull the tie cord that holds the Stix in a bundle. Legs automatically unfold and self assemble to their full height. Your sights level quickly, right on target, as you lay the forestock in the non-slip rubber V-yoke. Use sitting or kneeling. Three-section legs unfold from 14" to 39".

Steady Stix II #F3B39-R1X

Rapid Pivot Bipod Stock Attachment Hardware

Rapid Pivot Bipod System
Introducing the quickest attaching bipod on the market today. The Rapid Pivot Bipod System snaps right onto your rifle stock, giving you instant set-up for an accurate shot.

This innovative bipod weighs less than more expensive and complex mechanical bipods, but it out-performs them with its pivoting action, flexibility and solid support. Use it in the prone, sitting, kneeling or standing positions.

- ★ Quickly attach and detach from your forearm sling stud.
- ★ Pivoting action allows you to follow target.
- ★ Silent set-up.
- ★ Accommodates prone, sitting, kneeling and standing positions.

Rapid Pivot Bipod Stock Attachment Hardware

Rapid Pivot Monopod Attachment with Hardware

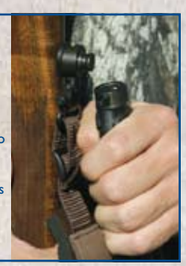
Hit those tough shots with the Rapid Pivot Monopod attachment that gives you extra flexibility and versatility when you need it. This attachment converts a hiking staff into a shooting rest, by clipping quickly on to your stock's swivel stud. The attachment allows you to immediately pivot your stock left or right, or make quick sighting adjustments by flexing up, down, left or right, and still allows you to use your sling. Includes all mounting hardware.

#RPM-102

Get that shot — optimum versatility is what you get with the **Rapid Pivot Monopod Attachment.**

The Rapid Pivot Monopod Attachment gives you great flexibility, allowing you to pivot the stock left or right, up or down… all to get that important shot.

★FYI –
The Rapid Pivot Monopod Attachment turns a walking stick into a shooting rest by quickly attaching onto your swivel stud. It provides rock-solid support, but still gives you the flexibility to get tough shots.



Swivel Pod

A new attached bipod with unrivaled swiveling, pivoting versatility – built with perhaps the most streamlined, lightweight design on the market today. Its extremely simple design and innovating folding mechanism keep weight to a minimum and deploy with blazing speed. The legs quickly adjust in height and move on individual ball joints, so uneven ground isn't a problem. And its central ball joint permits 360° motion for rock-solid assurance on moving game.

- ★ Deploys quickly
- ★ Incredibly lightweight
- ★ Ball joint system for 360° motion and adapting to uneven terrain.
- ★ Quick-adjusting legs

#84065 Adjusts from 12" - 18"
#84070 Adjusts from 15" - 26"

Tactical Bi-pod

One of the sharpest tactical moves you can make, this new lightweight, folding bipod attached your Picatinny raid and provides the ultimate blend of on-the-fly deployment and benchrest-steady aim. For moving targets and uneven ground, nothing comes close – its legs and central housing feature ball joints for silent adjustability and 360° motion.

- ★ Deploys quickly
- ★ Incredibly lightweight
- ★ Ball joint system for 360° motion and adapting to uneven terrain.
- ★ Quick-adjusting legs

9"-12" Tactical Bipod #84075

Mirage Plain

Mirage Basketweave

Kodra® Nylon

Our Mirage® Nylon looks and feels like leather, but outperforms it in 6 ways.

1. **Appearance**—A Mirage duty rig starts out looking like leather and continues to look sharp despite wear, dirt, moisture and rough usage.
2. **Weight**—Your lower back will thank you because Mirage products are constructed of Nytek nylon, making them significantly lighter than leather or other synthetic rigs.
3. **Durability**—Mirage is incredibly strong and abrasion-resistant, developed from microfibers that are 1,000 times finer than silk. It needs virtually no maintenance.
4. **Comfort**—More pliable than leather, Mirage flexes to your body's contours for better fit and feel.
5. **Cleaning**—A damp cloth is all it takes. And spilled blood won't seep into the pores of the Mirage material, so there's no threat of pathogens remaining behind. It's easy to decontaminate with bleach water.
6. **Odor**—Mirage doesn't absorb body odor, perfume or other odors. Nor will it rot, mildew or wear away your gun's bluing.

Our pioneering use of multi-layer laminates and Kodra nylon assures benefits you just can't get from nylon alone.

1. **Appearance**—The bonded foam creates clean lines and long-lasting good looks, while the Kodra exterior provides a professional, non-reflective surface.
2. **Performance**—Your duty items are properly supported and immediately removable—even under stress—thanks to the use of hardened inserts.
3. **Durability**—All materials used in our line resist abrasion and wear and protect your sidearm, radio, cuffs and chemical canisters from harm.
4. **Weight**—Your rig weighs less, so it's less tiring for you to wear. Your back and hips will welcome the change.
5. **Comfort**—Soft flaps, flexible bound edges and backwalls won't poke or cut into you. You'll be more comfortable at work and less fatigued at the end of your shift when you wear Uncle Mike's gear.
6. **Cleaning**—A damp cloth will work for most stains, while a soft nylon brush and water lifts out stubborn stains.

How to use the UNCLE MIKE'S LAW ENFORCEMENT® Holster Selection Guide

1. Just look up the brand of your handgun, then the particular model of gun, and the barrel length.
2. Numbers listed under each style of holster indicate the SIZE of holster you should buy.
3. Fit information for the following holsters can be found on earlier pages of this catalog: Kydex (Pg 18-19); Inside-the-Pocket holsters (Pg 21); Body Armor (Pg 22).

Gun Make and Model			Barrel Length	Ambidextrous Hip	Hip-Thumb Break	Paddle	Super Belt Slide	Pro-Pak® Horizontal	Pro-Pak® Vertical	PRO-3® Duty/Tactical	Dual Retention Duty/Tactical	Tactical/Flashlight/Laser	PRO-2® Jacket Slot	Inside-Pant Open	Ankle
